

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
1	Aadayse	Available: 4 transformers	No water. Using service water from Taybeh village	No drinking water	Alpha+MTC coverage	
2	Aabbasiyeh	Supplied from Zahrani station. There is a transfer station to all the neighboring villages. Cables and poles are extensively damaged. There are 3 private generators. The supply is good, but affected by rationing.	2 artesian wells, owned by the village. No government supply. No water storage tank. Other private wells.	Drinking water available	Land lines working as of 2nd week of September. Mobile network is functional.	
3	Ainatha	No electricity.	Water network is cut. The village needs 5 water tanks (400 liters each) to insure proper water storage.	No drinking water.	GSM connection weak.	
4	Aita al Zot	No electricity.	Water network is damaged. No water storage facilities. Need water pumps.	No drinking Water	GSM signal is good. No Landlines.	
5	Aita El Shaeb	No electricity.	Water tank available.			
6	al khiam	No electricity but there are some small private generators.	No water.	No drinking water.	GSM signal is good.	
7	Al-Tiri	No electricity.	No water.	No drinking water.	GSM working. No land lines.	60% damage
8	Al-Kantara	Electricity available.	No water.	No drinking water.	GSM working.	
9	Alma Chaeb	West side of village has no power at all. Eastern side only has power at night time.	Private well used by the whole village.	Same artesian well used for service water	the landline is not working.neither the GSM.	

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
10	Aytit	Electricity is available from a few days ago.	Water tank totally destroyed.	They bring water from Wadi Jilo, or they buy from stores.	GSM functional. No land lines.	
11	Baraashit	No electricity.	Personal wells.	Personal wells.	GSM coverage is poor. Landlines not working.	
12	Barich	Electricity has been restored lately but does not reach the whole village.	No water.	No drinking water.	Landline network damaged.	
13	Batoulay	60% coverage mainly in the east of the village.	Available.	Available.	GSM workin. No Landlines.	
14	Bayad	Available 12 hours per day.	One artesian well, enough for village usage. Need electrical generator for water pump.		GSM workin. No Landlines.	
15	Bayada		High shortage in water.	High shortage in drinking water.		
16	Beddias	electricity from Zahrani station. Infrastructure intact. No private generators.	Artesian well. Water tank. Safe infrastructure. Some privately owned wells.	No shortage.	GSM and landlines functioning.	
17	Beit Lif	No electricity.	No water.	No drinking water.	No landlines. GSM is fonctionning.	

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
18	Biflay	No electricity. 3 private generators in the town with approximately 50% of town connected to them.	Infrastructure to homes (water pipes, sewage, etc) not damaged. Water is not available. There is not enough fuel however, nor a generator big enough to pump water to supply village water needs from a local and available artesian well. If supplied with a generator (100-125 KVA) this well could supply the entire town with water, as well as the surrounding villages.			Town accessible. Damaged roads are in the process of being cleared by the municipality. There is still fuel of all types available in town (gas, diesel for generators, cooking gas) although the prices of fuels went up to prohibitive prices.
19	Blida	Electricity network was damaged.	No water (usually bought from Ttaybe).	Available.	GSM signal is weak. No landlines.	
20	Bint Jbeil	Electricity transferred from Sultaniyyeh. The government supply is very weak. All transformers burned during the war. There are some private generators (4-5 big generators light up 120 houses).	There are private wells Water is also transferred from Wadi Jilo or Ras El Ein. Internal network is working but no government supply. They have to dig 800 meters to find water.	There is an artesian well but not good for drinking. Needed drinking water even before the war. Some buy water from stores.	Landlines are cut and the network is totally damaged. GSM network is fine.	
21	Borj Kalaway	No electricity.	Water available but water tank needs to be changed.	Drinking water not available. Has to be bought from stores.	Landlines and GSM are working.	

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
22	Borj Rahhal	High frequency poles are damaged (from Zahrani station). Infrastructure is damaged and being fixed. Transformers burned. Main transformer is weak. No private generators. 30% damage.	Artesian well + large tank + generator for pump. No government water. Internal infrastructure available but not linked to external sources. There are small private wells. Fuel is needed to run the pumps.	Same as service water. Infrastructure is being fixed. Good quality/always checked & observed. Some residents buy water from market. Water line will be repaired in 2 weeks.	Landlines were damaged but now they are repaired. GSM weak. Internet: PCA station - net café.	
23	Chaatiyeh	Electricity is available from 8 to 10 hours a day, and covers all the village	Available.	Brought from the source in Ras El Ein.	Landlines and GSM are working.	
24	Chakra	Network is damaged.	The water storage of the village is not sufficient.	Drinking water is stored from the rain.	GSM coverage is weak.	
25	Debaal	No electricity.	No water	No drinking water.		
26	Deir Amess				GSM is functioning. No landlines.	
27	Beir Ntar	No electricity.	No water	No drinking water.	Landlines and GSM are working.	
28	Duheira	Available.	Available.	Available.	No GSM or landlines.	
29	Froun	No electricity. One generator, cannot feed the whole village.	No water	Provided by ACF.	GSM is functioning. No landlines.	
30	Haddatha	Some electricity transferred from Soultanieh.	Some shortage.	No drinking water.	GSM is weak. No landlines.	
31	Hanaway	Electricity is available only in the center of the village.	Bought from the market.	No drinking water.	GSM is functioning. No landlines.	
32	Haris	No electricity.	Need a pump.	Need a pump.	GSM is functioning. No landlines.	
33	Hiniye	No electricity.	No water.	No drinking water.	GSM is good. No landlines.	

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
34	Jbal El Botm	No electricity.	No water.	No drinking water.	GSM is good. No landlines.	
35	Jibbin	No electricity.	Pump needs electricity.	Drinking water is polluted.	GSM coverage is very poor. Landlines are only at 10% capacity.	
36	Jmajmeh	No electricity.	No water.	No drinking water. 70% of population not getting clean drinking water.	GSM is weak. No landlines.	
37	Kafra	No electricity.	No water.	No drinking water.	GSM is good. No landlines.	
38	Kfardounine	No electricity.	No water.	No drinking water.	N/A	
39	Khiam	No electricity.	Water network is damaged. There is a well and a small truck is doing the distribution. The water pumps are in a good condition.		GSM is weak. No landlines.	
40	Klayleh	No electricity. Few generators are available.	Big shortage of water supply.	The village needs a 250 kva generator to pump water.	GSM is good. No landlines.	
41	Knayseh	Electricity available for 8 hours/day and covers all the village.	Water is available from a nearby spring.	Purchased from the market.	N/A	
42	Kounine	4 electricity transformers were destroyed during the war. The electrical network is down. 22 small generators distribute electricity to subscribers.	Purchased from market or brought from nearby springs (Ein Jdide, Ein Tahta).	Purchased from market or brought from nearby springs (Ein Jdide, Ein Tahta).	GSM is good. No landlines.	

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
43	Maarakeh	Electricity was fixed in the first half of September. Available for 20 hours per day.	The municipality distributes from the Wadi Jilo station. There are some private artesian wells.	Purchased from market or from wells.	GSM is good. Landlines were fixed.	
44	Maaroub	No electricity.	There is no electricity to pump the water. They need a generator (175 kva) to pump water from the well and to homes. There are tractors for transportation of water. Water that they are able to use is found to have high levels of calcium in it. Water pipes from the main source have also been damaged.	There is no source of drinking water. They are forced to buy bottles from Tyre.	N/A	
45	Mahrouna	No electricity.	No water.	No drinking water.	GSM is good. No landlines.	
46	Majdel Zoun	75% of the village is not powered.	Service water available.	Drinking water is not clean.	GSM is good. Landlines are at 50%..	
47	Manouri	Electricity is available only at night.	Water is available but need mazout for the pump.	Same water is used for both drinking and service.	Landlines and GSM are working.	
48	Maroon El Ras	100% damage.	100% damage.	100% damage.	100% damage.	
49	Marwahin	No electricity because the network is extensively damaged.	1 well provides water to the village but needs a water pump (250 kva).	1 well provides water to the village but needs a water pump (250 kva).	GSM coverage is poor. Landlines not working.	
50	Mays El Jabal	No electricity.	No water.	No drinking water	No GSM or landlines.	
51	Mazret Mishref	No electricity.	No water.	No drinking water	GSM is good. No landlines.	
52	Qana					

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
53	Ramadiyeh	Electricity available 12 hours/day and covers the whole town.	Service water is available.	Drinking water is available. Some is purchased from market.	Landlines and GSM are working.	
54	Reshkananay	No electricity. Some small private generators.	Available for 60% of village. 40% buy the water from Qana.	Available for 60% of village. 40% buy the water from Qana.	GSM is good. No landlines.	
55	Rshaf	4 transformers destroyed completely. All cables have been cut.	90% of household water tanks were destroyed.	No drinking water.	GSM is good. No landlines.	
56	Safad Al Batikh	No electricity.	No private water tanks. 40% of government water is out of service.	Drinking water is available.	GSM: Alpha coverage is good. MTC does not have a signal.	
57	Shahabieh	No electricity. A generator is present to cover 50% of electricity needs, but there is a high fuel shortage and no budget to cover its prices.	No water. Village well needs electricity for pumps.	No drinking water.	N/A	
58	Chohour	No electricity.	No water.	No drinking water	N/A	
59	Silaa	No electricity.	No water.	No drinking water	N/A	
60	Srifa	No electricity.	No water. The main water source is an artesian well in the village. It needs a generator to operate the pumps.	No drinking water	Alpha and MTC both have reception (the antenna is intact). The landlines are not in use.	
61	Sorbine	No electricity. 2 private generators are used to pump water.	No new water supplies. The village is using water already available in the water tanks.	No drinking water. Drinking water tank is damaged.	GSM is good. No landlines.	
62	Sultaniyeh	No electricity.	No water.	No drinking water. Drinking water tank is damaged.	GSM is good. No landlines.	

#	Location	Electricity	Water	Potable Water	Phone/GSM/Internet	Roads
63	Tayr Harfa	Electrical network was destroyed (source from Bourj El Shemali). Private generators.	The network is damaged. Stored water before war was from last winter. It is polluted now.	No network anymore. Citizen are buying water or they are using the service water for drinking.	(07) is fixed lately.alpha 7 mtc has a very low signal.	1 roundabout (Hay Abou Shash) is damaged.
64	Taybeh	No electricity.	No water.	No drinking water	GSM is good. No landlines.	
65	Wadi Jilo	Electricity available.	Water is available.	Drinking water is available.	N/A	
66	Yanouh	Electricity was fixed in the first half of September.	Water is available as usual, but before the war they were suffering from water problems.	Drinking water is not available. They actually drink from service water (unfiltered), leading to diarrhea.	GSM is good. Landline is still damaged.	
67	Yaroun	No electricity network. The generator (70KVA) has been destroyed.	No network anymore. Using stored water from last winter or purchasing from Aita Chaab.	No drinking water. There is a source (spring), but cannot be used since it is close to the Israeli borders.	GSM: MTC has good signal, Alpha has no signal. No landlines.	
68	Yater	Electrical network was completely destroyed.	Cannot be provided due to lack of electricity.	No drinking water.	GSM is good. No landlines.	
69	Zebkin	There is no electricity in the village. The UN is providing electricity to 15 houses. The village needs two big generators to cover the village with electricity.	There is no storage facility and the pump is not powered.	No drinking water is provided in the village.	GSM connection is fair. Landlines are not working.	
70	Beit Yahoun	No electricity even before the war. Now fixed, 2 hours /day, but not for all the village. There were 5 generators, but now all destroyed.	There is some water but not available for all the village.	No drinking water. The only source of water was damaged.	GSM is good. No landlines.
